Smart Food Sensing

Our cutting-edge mobile app leverages to ensure you always get the freshest, highest-quality organic foods.

Detection of Artificially Ripened Banana

Discover our cutting-edge solution for detecting artificially ripened bananas.our system accurately identifies bananas treated with harmful chemicals. Ensure consumer safety and satisfaction by offering only natural, nutritious bananas.

Milk Quality Detection

utilizing IoT sensors for real-time monitoring of temperature and pH levels. Safeguarding against spoilage and contamination, it ensures freshness and safety in dairy production. Enhance quality control and consumer trust with our advanced technology.

Optimizing Fruit Quality and Minimizing Wastage

Optimize fruit quality and minimize wastage with our innovative solutions. Through real-time monitoring of temperature and humidity along the supply chain, we ensure optimal conditions for freshness. Increase shelf life and reduce spoilage, enhancing both food quality and sustainability.

Real-time Fruit quality Detection

Experience real-time fruit grading with our innovative Visual Inspection System. we ensure accurate and efficient sorting. Enhance productivity and quality control in fruit processing with our cutting-edge technology.
